Objet: Boyum IT: 2026 Maintenance and Software License Pricing

Dear Partner,

As we look ahead to 2026, we would like to share important information regarding upcoming adjustments to maintenance renewals, with further updates on general software license pricing to follow.

Each year we review pricing to reflect market conditions while ensuring we can continue to deliver the quality, innovation, and partner support you rely on.

2026 Maintenance and Software License Pricing

Starting **January 1, 2026**, perpetual maintenance renewals will include a **2.5% increase**. Updated renewal calculations will be available in the Boyum IT Portal from **October 15, 2025**, giving you time to prepare and align with your customers before invoices are issued.

As in previous years, there is **one exception**:

Perpetual licenses purchased between September 1, 2025 and December 31, 2025 will not be subject to the 2026 maintenance price increase

We are also reviewing general license pricing for 2026 and will communicate any confirmed adjustments by **November 1, 2025**. This will provide you with time to update price lists, quotation tools, and customer communications before any changes take effect.

If you have any questions, please do not hesitate to contact your Channel Sales Manager or reach out to us at sales@boyum-it.com.

Thank you once again for your continued trust and collaboration. We look forward to building another successful year together.

Warm regards,
Boyum IT
