Objet: Boyum IT: 2027 maintenance and software license pricing

Dear Partner,

As we begin preparing for 2027, we want to give you early visibility of an upcoming adjustment to our perpetual maintenance renewal pricing.

We value the role you play in supporting our customers and growing our business together. Providing this information in advance gives you time to prepare, update your systems, and have the right conversations with your customers.

2027 Perpetual maintenance renewals

From **January 1, 2027**, perpetual maintenance renewals **will increase by 3%**.

Updated renewal values will be available in the Boyum IT Portal from October 30, 2026, giving you time to review the changes before renewal invoices are issued.

One exception will apply:

Perpetual licenses purchased between September 1 and December 31, 2026, will not be affected by the 2027 maintenance increase.

Software license pricing

We are also reviewing our general software license pricing for 2027. Any confirmed changes will be shared by November 1, 2026, so you have time to update your price lists, quotation tools, and customer communications before the new pricing takes effect.

These annual reviews help us continue investing in our solutions, services, and the support we provide to you and your customers.

If you have any questions or would like to discuss how the change may affect your business, please contact your Channel Sales Manager or email sales@boyum-it.com.

Thank you for your continued trust, commitment, and collaboration. We greatly value our partnership and look forward to achieving more together in 2027.

Warm regards,

Boyum IT
