- 2007 SAP and beas started to market industry solutions
- 2010 SAP certification of "Enabled by SAP Business One"
- > 400 customers in 34 countries
- Approx. 7'400 be.as user and 9'200 SAP® Business One user (March 2011)
- 15 supported language versions

# **Mission Statement**

#### Our expertise

We have been the partner for SMEs for over 20 years. Since 2002, we have concentrated our efforts exclusively on the development and marketing of standard software based on SAP© Business One for discrete and process manufacturing as well as the parts supply industry.

#### Quality and scalability of our industry solutions

be.as modules are SAP-certified and targeted on small and medium-sized enterprises and the subsidiaries and branch offices of large organizations for world-wide use and integration with SAP R/3 and ERP 6.0.

#### Support and maintenance for our customers

We support you in Germany and neighboring countries through direct activities (new branches, strategic projects) on the one hand and through competent and certified partners near you on the other hand. Our subsidiaries in cooperation with strategic partners also market and implement SAP© Business One / be.as in the other countries of Europe, North and Latin America and Asia / Pacific Region.

# be.as Manufacturing for Machinery and Apparatus (1)

- Machinery
- Engines, turbines, pumps
- Construction and farm machinery
- Machine tools
- Robots and handling equipment
- Special-purpose machines
- Plants
- Transportation equipment
- Equipment, parts for aircrafts, water crafts, rail and road vehicles

# be.as Manufacturing for Machinery and Apparatus (2)

- Electrical and electronic equipment
- Office equipment, machines
- Household equipment
- Consumer electronics
- Electrical equipment
- Powersupplies, equipment
- Communications equipment
- Electronic components
- Instruments and related products
- Analytical, measuring and control instruments
- Laboratory equipment
- Medical devices
- Optical, photographic devices
- Timepieces, parts

# be.as Manufacturing for Metal and Plastics Processing (1)

- Service-oriented metal processing
- Surface treatments
- Turning, punching, forming, etc.
- Structural metal work like
- Hand tools, metal goods
- Cans, bins, vats
- Hydraulic and pneumatic elements
- Equipment for plumbing, heating, etc.
- Metal construction
- Structures of welded sheet metal
- Metal constructions like stages, fencings, grids, ducts
- Steel/metal work
- Heavy gauge tanks, vessels, etc.

# be.as Manufacturing for Metal and Plastics Processing (2)

- Plastics and rubber processing
- Foils, plates, profiles, tubes
- Gaskets, hoses, belts
- Hydraulic and pneumatic elements, fittings
- Bags, sacks, bins, bottles

## Plastics and rubber equipment for

- ITC
- Machinery and automotive
- Laboratory, medical supplies
- Plumbing, heating, construction
- Household
- Personal security

#### Plastics/rubber – metal assembl.

# be.as SCM (Supply Chain Management) for Supply Industry (1)

Automotive

- Tier 1 enterprises with direct supplies to car manufacturer and purchase orders to tier 2 or 3 suppliers
- Tier 2 or 3 enterprises with supplies to upstream suppliers (e.g. tier 2 or 1)
- Industry-specific communication standards have to be used
- Other enterprises as part of a supply chain
- Manufacturing enterprises
- Trading, distribution, logistic companies
- Communication only partly standardized or defined by key accounts individually

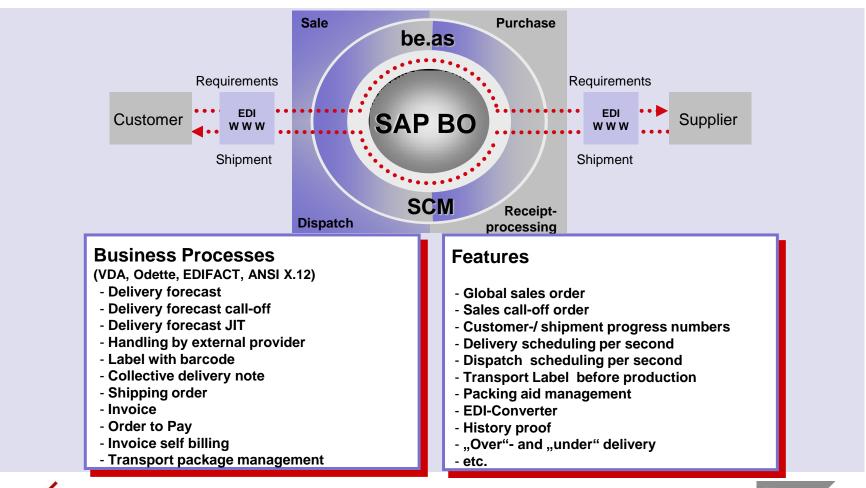

# be.as SCM (Supply Chain Management) for Supply Industry (2)

# be.as Manufacturing for Chemical Engineering

- Industrial organic chemicals
- Plastic materials, resins, fibers
- Soaps, cleaners
- Paints, lacquers
- Agricultural chemicals
- Various chemicals
- Oils, greases
- Papers, floor coverings

# be.as Manufacturing for Packaging Industry

- Fabrication of packaging material
- Paper and allied products like
  - Coated, printed papers
  - Bags, boxes
- Plastic goods
  - Foils, bags, containers
  - Coated, printed
- Steel / aluminium goods
  - Foils, blisters, cans, etc.
- Wood products
- Processing of packaging material
- Food
- Pharmaceutical goods
- Chemical goods
- Cosmetics, etc.

# be.as Manufacturing for Food

- Meat products
- Creamery products
- Dried, condensed, evaporated, frozen products
- Mill products
- Animal food
- Bakeries and candies
- Oils, fats
- Beverages

# **beas International Rollouts** - Skills

#### SAP<sup>®</sup> Business One

- Functionality
- Implementation in several industries
- Customization, additional developments, integration 3<sup>rd</sup> party software

## be.as Manufacturing and Supply Chain Management

- Functionality
- Implementation in manufacturing companies
- be.as Supply Chain Management additionally in distribution / logistics
- Customization, additional developments, integration 3<sup>rd</sup> party software
- R/3 and MySAP Integration
- Master, financial and order data
- Application of B1ISN
- Application of ibolt/magic

# beas International Rollouts

- International Scalability

## Project coordination / management

By beas or one of its strategic partners

## Template / Blueprint / Pilot

- Location to build a template or blueprint can be chosen by the customer
- No geographic limits to implement the pilot

# Rollout

- Depending on the strategy of the customer
- Can be done by the rollout team of beas or beas' strategic partners
- In combination with the core team and/or local subsidiaries of the customer
- By the core team of the customer independently
- Involvement of experienced local SAP<sup>®</sup> Business One / be.as partners as needed

### International / geographical coverage

Europe, Americas, Asia / Pacific, Africa

- be.as Configuration Wizard to create Templates / Pilots

#### Fast and comprehensive configuration of SAP Business One / be.as

- Centralized adjustment of all important parameters and settings
- Rule- and multi-level based configuration according to customer specific needs
- Administration of the settings like logging, export, using for support requests, etc.

# Integrated checks of data integrity

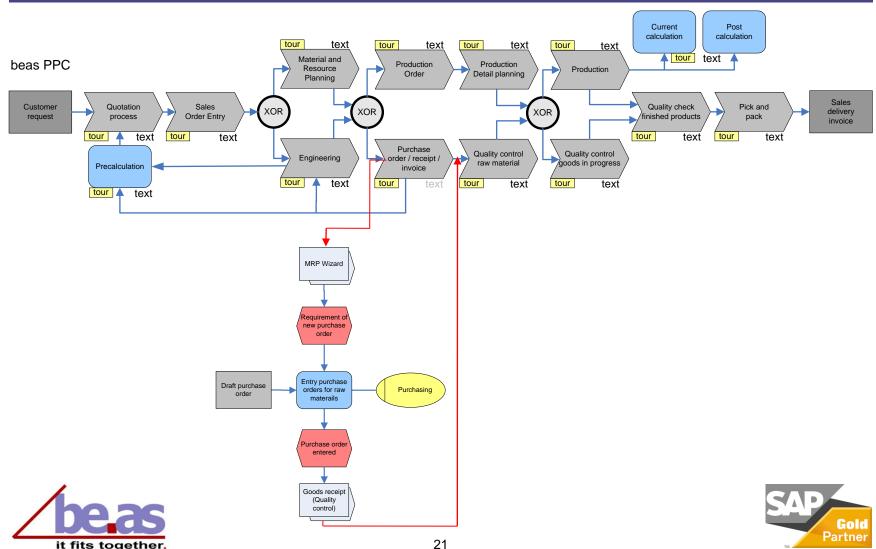

- Important after data migration and during current data administration
- Inconsistencies will be detected immediately and can be edited directly
- Enables better self-control by the customer and saves support time and money

### **beas International Rollouts** - Reasons for SAP<sup>®</sup> Business One / be.as

#### Strategic rollout

- In small and mid-sized subsidiraies world-wide
- New subsidiary
- New foundation
- Acquisition
- Spin-off
- Change management
- Rightsizing

## Integration / migration options

- Integration in R/3 / MySAP
- Subsidiary can be migrated later on to R/3 / MySAP with little effort
  - E.g. Siemens migrated a subsidiary in Romania after >4 years usage of SAP<sup>®</sup> Business One / be.as and strong growth of the subsidiary from 50 to > 350 employees
  - E.g. KSB intends to migrate in 2009 KSB Shanghai Pumps with currently more than 100 active SAP<sup>®</sup> Business One / be.as users and > 600 employees after >4 years usage and strong growth
